

Partial_Fifth_Decade_2010_2012

Main Papers:	Page
The Geotechnical Problems of the World Second Largest Copper Tailings Pond at Zelazny Most, Poland <i>by M. Jamiolkowski, W.D. Carrier, R.J. Chandler, K. Hoeg, W. Swierczynski and W. Wolski</i>	1
Testing in Geotechnical Design <i>by Dennis E. Becker.....</i>	17
Shaking Table Tests for Studies of Soil Liquefaction and Soil-Pile Interaction <i>by T.S. Ueng.....</i>	29
Rainfall-Triggered Landslide: from research to mitigation practice in Thailand <i>by Suttisak Soralump.....</i>	39
Main Papers:	Page
Bridge Foundation Scour <i>by Jean Louis Briaud and Seung Jae Oh.....</i>	45
Settlement of Embankments in Soft Soils <i>by A. S. Balasubramaniam, H. Cai, D. Zhu, C. Surarak, E. Y. N. Oh.....</i>	61
Seismic Performance of Piles from PBEE and EQWEAP Analyses <i>by D.W. Chang, T.Y. Yang and C.L. Yang.....</i>	79
The Improvement of the Prediction Accuracy of the System of Real –Time Type Hazard Map of Slope Failures Disasters Caused by Heavy Rainfalls <i>by T. Okimura, N. Torii, Y. Osaki, M. Nanbu and K. Haraguchi.....</i>	87
A Case Study of Settlement Behaviour of a Dynamic Compacted High Rock Embankment <i>by Kyung-Tae Bae, Tae-Hoon Kim and Young-Jin Kim.....</i>	93
Main Papers:	Page
The Recent Advances in Pile Testing and Diaphragm Wall Construction in Japan <i>by Kenji Ishihara.....</i>	97
Ground Improvement – A Green Technology towards a Sustainable Housing, Infrastructure and Utilities Developments in Malaysia <i>by Kenny Yee and Dr. Ooi Teik Aun.....</i>	123
The Enhancement of Pile Capacity by Shaft Grouting Technique in the Ruspa Bridge Project in Bangladesh <i>by Ryuji Manai.....</i>	143
Piled Raft - A Cost-Effective Foundation Method for High-Rises <i>by Phung Duc Long.....</i>	149

Main Papers:	Page
Foundation Design of the Incheon Bridge <i>by Sung-Min Cho</i>	159
Living with Landslide Risk <i>by Lacasse, Nadim and Kalsnes</i>	173
Erosion, Slope Stability, Prediction of Future Recession in Actively Eroding Slopes <i>by Tuncer B. Edil</i>	185
Engineering Protocols for the Assessment of the Net Moisture Flux at the Ground Surface <i>by D.G. Fredlund, H.Q. Vu and J. Stianson</i>	193
Response of Porous Seabed to Dynamic Loadings <i>by D-S Jeng, X L Zhou, X D Luo, J H Wang, J Zhang and F P Gao</i>	205

Papers_2011

Paper Title	Pages
Some Issues in Geosynthetic Reinforced Walls and Slopes by D. Leshchinsky.....	1 – 8
Advance in Geogrid Reinforced Slopes in Malaysia by T.A. Ooi and C.H. Tee.....	9 – 34
Embankment Construction with Saturated Clayey Fill Material Using Geocomposites by J.-C. Chai, T. Hino, Y. Igaya, and Y. Yamauchi	35 – 41
Numerical Modeling of Geosynthetic-Reinforced Earth Structures and Geosynthetic-Soil Interactions by J. Huang, A. Bhandari, and X. Yang.....	42 – 55
Geosynthetic Tubes and Geosynthetic Mats: Analyses and Applications by J. Chu, W. Guo, and S.W. Yan.....	56 – 65
Performance-based Design for Geosynthetic Liner Systems in Landfills by Y.M. Chen, W.A. Lin, B. Zhu, and L.T. Zhan	66 – 73
Quantifying the Influence of Geosynthetics on Performance of Reinforced Granular Bases in Laboratory by J. Han, Y. Zhang, and R.L. Parsons.....	74 – 83
Paper Title	Pages
Field Measurements on Piled Rafts with Grid-Form Deep Mixing Walls on Soft Ground by Kiyoshi Yamashita, Junji Hamada and Takeshi Yamada.....	1-10
Static Axial Reciprocal Load Test of Cast-in-place Nodular Concrete Pile and Nodular Diaphragm Wall by K. Watanabe, H. Sei, T. Nishiyama and Y. Ishii.....	11-19
Vertical Load Test and Settlement Analysis of Cast-in-place Concrete Nodular Piles Supporting a High-Rise Building by N. Suzuki and T. Seki	20-28
Extended Use of Spring Hammer Rapid Load Testing by K. Matsuzawa and T. Matsumoto.....	29-42
Push-up Load Tests Using Uncrushable Particles and Its DEM Analyses by SuriyahThongmunee, Shun-ichi Kobayashi and Tatsunori Matsumoto	43-55
On Design and Construction of Pile Group Foundation of Taipei 101 by Ching-Han Yu	56-69
Capacity versus Deformation Analysis for Design of Footings and Pile Foundations by Bengt H. Fellenius	70-77
Pile Raft Foundations for Tall Buildings by H.G. Poulos, J.C. Small and H. Chow	78-84
Foundation Design of the 151 Story Incheon Tower in a Reclamation Area	

by Ahmad Abdelrazaq, Frances Badelow, Sung Ho-Kim, Harry G. Poulos 85-93

List of Papers	Page
Building Damage Assessment for Deep Excavations in Singapore and the Influence of Building Stiffness by K.H. Goh and R.J. Mair.....	1-12
Concept and Design Methodology of Redundancy in Braced Excavation and Case Histories by G. Zheng, X.S. Cheng, Y. Diao, and H.X. Wang	13-21
Three-Dimensional Deformation Behavior of an Over-sized Excavation in Shanghai Clay by Y. M. Hou, J. H. Wang and D-S. Jeng	22-29
Numerical Study on the Movement of Existing Tunnel Due to Deep Excavation in Shanghai by J. J. Chen, J. H. Wang, G. W. Xiang, S. L. Wen, and Y. Du	30-40
Observed Performance of Diaphragm Wall Construction by C.Y. Ou and L.L. Yang	41-49
Performance of Construction with New Pneumatic Caisson Method in Shanghai Soft Ground by F.L. Peng and H.L. Wang	50-58
Technologies of Micro-disturbance Construction of Pipe-Jacking by W. Q. Ding, B. Li, S. L. Yuan and J. K. Ge	59-64
Design and Construction of InJe Tunnel, the Longest Road Tunnel of Korea by S. M. Cho, S. D. Lee, and Y. J. Kwon	65-74

List of Papers	Page
Research Papers:	
Dilation and Stability of Sand in Triaxial Tests by A. Sawicki	1 - 9
The Strength Anisotropy of a Residual Soil in Singapore by G. Meng and J. Chu	10 -18
Effect of Boundary Conditions on Shear Banding in True Triaxial Tests on Sand by P.V. Lade and Q. Wang	19 - 25
Behavioural Patterns of Fine Sands by V.N. Georgiannou	26 - 41
Simulating Shear Rate-Dependent Undrained Stress-Strain Behaviour of Natural Sedimentary Clay at Kobe Airport by M.-S. Jung and S. Shibuya	42 - 52
Experimental Investigation on Settling Behavior of Hong Kong Marine Deposits in Settling Column Condition by F. Tong J.H. Yin and G.F. Zhu.....	53 - 57
Development of a Hollow Cylinder Torsional Apparatus for Pre-failure Deformation and Large Strains Behaviour of Sand by E. Ibrahim, P. Christiaens and M. Pope	58 - 68
Effect of High Confining Pressure on the Behaviour of Fibre Reinforced Sand by S. Ud-din, A. Marri and D. Wanatowski	69 - 76

TECHNICAL NOTE

**A Comment on the Ratio of the Maximum and
Minimum Dry Density for Sand**

by E. Imre, S. Fityus, E. Keszeyne and T. Schanz..... 77 - 82

Papers_2012

List of Papers Page

Some Applications Of Unsaturated Soil Mechanics In Thailand: An Appropriate Technology Approach

by W. Mairaing, A. Jotisankasa and S. Soralump 1 - 11

Calculation Of Heave Of Deep Pier Foundations

by J.D. Nelson, K.C. Chao, D.D. Overton and R.W. Schaut 12 -25

In-Situ And Laboratory Investigations Of Stress-Dependent Permeability Function And SDSWCC From An Unsaturated Soil Slope

by C. W. W. Ng and A. K. Leung 26 -39

Measurements Of Shrinkage Induced Pressure (Sip) In Unsaturated Expansive Clays

by A.J. Puppala, T. Wejrungsikul, V. Puljan and T. Manosuthikij 40 - 47

Unsaturated Soil Mechanics For Slope Stabilization

by H. Rahardjo, A. Satyanaga, E. C. Leong 48 – 58

The Development Of Unsaturated Soil Mechanics At Imperial College, London

by J.R. Standing 59 - 75

Climate Change And The Role Of Unsaturated Soil Mechanics

by D.G. Toll, J. Mendes, P.N. Hughes, S. Glendinning and D. Gallipoli76 - 82

Some Mining Applications Of Unsaturated Soil Mechanics

by D.J. Williams 83 - 98

List of Papers Page

Proposed Changes to the Geotechnical Earthquake Engineering Provisions of the Bangladesh National Building Code

by Tahmeed M. Al-Hussaini, Tahsin R. Hossain and M. Hayeem Al-Noman 01 - 07

Analysis of Soil Liquefaction during the Recent Canterbury (New Zealand) Earthquakes

by RP Orense, MJ Pender and LM Wotherspoon 08 - 17

Numerical Simulation of Seismic Slope Stability Analysis based on Tension-Shear Failure Mechanism

by Yingbin Zhang, Guangqi Chen, Jian Wu, Lu Zheng, Xiaoying Zhuang 18 - 28

A Real-time Prediction Method for Regional Rainfall-induced Geohazards in Post-earthquake Region of Wenchuan Earthquake

by Z. Yang, J. Qiao, H. Tian, D. Huang, M. Wang and H. Meng 29 - 32

Effects of Anisotropic Consolidation and Stress Reversal on the Liquefaction Resistance of Sands and Silty Sands

by Abbas Galandarzadeh and Alireza Ahmadi 33 – 39

Characteristics of Slope Failures During Natural Disasters Considering Geographical Features and Groundwater Level: Case Study of the Chuetsu Region of Niigata, Japan

by H. Toyota 40 - 48

Overview of the Geotechnical Damages and the Technical Problems Posed after the 2011 off the Pacific Coast of Tohoku Earthquake

by M. Kazama, T. Noda, T. Mori and J. Kim 49 – 56

Development of Potentail Map for Landslides Induced by the Chi-Chi Earthquake Using Instability Index

by Meei-Ling Lin and Yu-Hung Shu 57 - 64

Technical Notes:

Geotechnical Hazards with Emphasis on Seismically-Combined Effects on Slopes by Ikuo Towhata	65 - 70
Monitoring on Earthquake Induced Landslide - A Case Study in Northwest Chengdu, China by Hongling Tian, Jianping Qiao., Taro Uchimura and Lin Wang	71 - 74

List of Papers Page

Waste/Lining System Interaction: Implications for Landfill Design and Performance by N. Dixon, K. Zamara1, D.R.V. Jones and G. Fowmes	1-10
Wrinkling of a Geomembrane on a Compacted Clay Liner on a Slope by R. K. Rowe, P. Yang, M.J. Chappel, R.W.I. Brachman , W.A. Take	11-18
Diffusion of phenolic compounds through an HDPE geomembrane by N. Touze-Foltz, M. Ahari, M. Mendes, C. Barral, M. Gardoni and L. Mazéas	19-29
Shear-Induced Geomembrane Damage due to Gravel in Underlying Compacted Clay by P. J. Fox, C. Athanassopoulos, S. S. Thielmann, and A. N. Stern	30-34
Evaluation of mineral barriers against acid rock drainage by A. Naka, T. Katsumi, G. Flores, T. Inui, T. Ohta, T. Urakoshi, and T. Ishihara	35-42
Improvement on the Performance of Geosynthetic Clay Liners Using Polymer Modified Bentonite by Y. Liu, W. P. Gates and A. Bouazza	43-45
Effect of Settlement rate and Geogrid reinforcement on the Deformation Behaviour of Soil barriers of Landfill Covers: Centrifuge Study by S. Rajesh and B.V.S. Viswanadham	46-54
Effect of differential settlements on the sealing efficiency of GCLs compared to CCLs: Centrifuge Study by B.V.S. Viswanadham, S. Rajesh and A. Bouazza	55-61
Geosynthetic Lining System for Modern Waste Facilities – Experiences in Developing Asia by H. B. Ng and B. Ramsey	62-67
The Use of Geosynthetics in Major Metropolitan Landfills in Perth, WA – Two Case Studies by L. Du Preez, R. Beaman and I. Watkins.....	68-70

List of Papers Page

Evaluation of existing CPT correlations in silt by A. S. Bradshaw, A. C. Morales-Velez and C.D.P. Baxter	1 - 10
Characterisation of quick clay at Dragvoll, Trondheim, Norway by A. Emdal, M. Long, A. Bihs, A. Gylland and N. Boylan	11 - 23
Field response of push-in earth pressure cells for instrumentation and site characterization of soils by Alan J. Luteneegger	24 - 33
Frequent-interval SDMT and continuous SCPTu for detailed shear wave velocity profiling in soils by T. Ku and P.W. Mayne	34 - 40
In situ testing of peat – a review and update on recent developments by M. Long and N. Boylan	41 - 55
Understanding the stiffness of soils in Singapore from pressuremeter testing by K.H. Goh, K. Jeyatharan and D. Wen	56 - 62
In situ measurement of hydraulic conductivity of saturated soils	

by D.J. DeGroot, D.W. Ostendorf and A.I. Judge	63 - 71
Rate effect on cone penetration test in sand	
by F. A. B. Danziger and T. Lunne	72 - 81
